Recap of the Introduction

- The EDC community continues to grow and organizations joining

    - More organizations, more domain, more use cases

- The EDC is continuing to evolve into a complete dataspace platform

- Implementation of IDS support in progress (Milestone 1)

- Show multi-cloud support

What's next

- Gaia-X Hackathon on the 2nd and 3rd Dec. 2021 (likely remote)
  - Build a demonstrator for IDS-based communication
    - Data transfer with IDS-based policies, IDS-Broker registration, DAPS
    - Milestone for Catena-X and MDS initiatives (migrate to EDC possible)
  - Ask for support for presenting EDC progress updates and roadmap
- 3rd EDC Hackathon proposed early February
  - Beautiful city of Amsterdam
  - Ideation of topics via Github

INCUBATION

What's next

- Approach additional organizations to join the project

    - Open for collaboration with other projects of other ecosystems (Gaia-X, IDSA, others)

- Use Hackathon result as blueprint for other use cases

    - Data space business committee (DSBC) in Gaia-X

- Enhance documentation

    - Additional repositories available (publications and communication collaterals)

    - Simplify onboarding

- Build website and additional communication material

    - Finalize the logo (yes we have a draft now ☺)
